

温州肯恩大学
WENZHOU-KEAN UNIVERSITY

MGS 4701 W01 | Fall 2026

Integrative Application of Business Analytics

Course Introduction & House Rules

Dawei CHEN

Week 1-1 | Tuesday, 01 September 2026

Today

1. Who is in the room — quick poll
2. How this course is designed
3. What we cover – SLO, format, tools, schedule
4. Assessment and the group project
Full instructions come on Thursday, 03 Sep
5. AI policy and house rules
6. What to do before Thursday

Ask questions at any point. You do not need to wait for the end.

About Me

Dawei CHEN

Education

- B.S. in Economics – SEM, THU
- Ph.D. in Information Systems – SOC, NUS
- Postdoc in AI Governance – AISG, NUS

Research: information privacy, economics of generative AI

Interests: fitness, hiking, marathon, scuba diving

Office: CBPM B214 **Email:** dchen@kean.edu

Office hours: Tue 16:00 – 17:15 | Wed 15:00 – 16:00 | Thu 14:15 – 17:00

Taken in Da Luo Shan, Wenzhou, 2026-08-23

Quick Poll – Who Is in the Room

Hands up. No names, no judgement — I am calibrating the pace of the course.

- 1) Who is in Year 4? Anyone in Year 3, or visiting from another major?
- 2) How many internships have you completed? None, One, Two or more
- 3) Who has sat a real interview — internship, full-time, or graduate admissions?
- 4) Who has built an end-to-end data project outside a course assignment?

Collected the data yourself, analysed it, produced something someone else read

- 5) Who has scraped a website or called an API before?
- 6) How do you use generative AI tools every day?

Quick Poll – Your Next Twelve Months

Hands up. No names, no judgement — I am calibrating the pace of the course.

- 1) How many courses are you taking this semester?
- 2) Who is writing the MGS 4998 senior thesis this semester?
- 3) Who plans to apply to a master's programme?
- 4) Where are you applying? Hong Kong, Singapore, UK, US, Europe, mainland China
- 5) Who has already drafted a CV or a personal statement?
- 6) Which part worries you most?

Choosing programmes, CV and portfolio, test scores, interviews

Where MGS 4701 Sits

You already have the toolkit. This course is about choosing among the tools.

What you bring

- MGS 2150 Business Statistics (Y2 Fall)
- MGS 3001 Python for Business (Y2 Spring)
- MGS 3101 Foundation of Business Analytics (Y3 Fall)
- MGS 3501 Database Management (Y3 Spring)
- MGS 3701 Data Mining in Business (Y3 Spring)

What this course adds

- Web scraping with Python
- Unstructured text analysis
- Causal inference – A/B test, DID
- AI-assisted business analytics
- GitHub for version control and a repository

Course Design Principles

- **Year 4** — your transcript is nearly written; your portfolio is not
What you can still change before you apply is what you can show
- **Synthesise** — one group project, three checkpoints
Not three assignments, 28 Sep · 4 Nov · 17 Dec, each one building on the last
- **Your market** — the project's subject is the market you are about to enter
BA job postings, master's programmes, interview requirements
- **GitHub** — everything you build is portfolio material
A public repository, a dataset, notebooks, a report, an oral defence
- **AI** — part of the method, not something you hide
Prompts > workflows > skills > agents, 4D AI fluency framework, AI-assisted BA

Course SLOs

Upon successful completion of this course, you will be able to:

- A. Define and formulate a real business problem, or an area of improvement that may be developed using business analytics tools and techniques
- B. Evaluate the changes required at the strategic level to leverage data science and demonstrate the paradigm shift towards applying business analytics techniques
- C. Apply data analysis and data mining techniques to identify information and insights from huge volumes of structured and **unstructured data**
- D. Synthesise the learning experiences acquired in the Business Analytics option to effectively **recommend solutions for business problems**
- E. Create standards and measures to **track and evaluate the impact of the proposed solution** on the organization

Section-Level SLOs

Specific to this section, you will be able to:

- A. Design and execute a Python pipeline that **collects** business **data** from **web** sources
- B. Transform **unstructured text** into analysis-ready variables
- C. Select and justify a **diagnostic, causal, or prescriptive** method appropriate to a given business problem
- D. Integrate **generative AI** into a business analytics **workflow**
- E. Communicate analytical work to non-technical audiences

Course Format

- Lecture — concepts, method choice, worked examples
- Lab — four sessions, applied to your own team's data. Bring your laptop.
Lab 1 scraper build (15 Sep) · Lab 2 text analytics (27 Oct)
Lab 3 causal inference (19 Nov) · Lab 4 prescriptive analytics (1 Dec)
- Consultation — three in-class gates, 15 minutes per team
29 Sep collection gate · 5 Nov dataset gate · 8 Dec presentation gate
- Mock interview — two rounds, 17 Sep and 17 Dec
- Guest speaker — 3 Dec (tentative)
- Outside class: read what is posted, keep your repository current, meet your team.

Materials and Tools

- No textbook required

Slides, notebooks, readings, and datasets are posted on Canvas

- Bring to every lecture, lab and consultation

A laptop with Python 3, Jupyter, and VS Code installed, a GitHub account

- Where to look things up

Official documentation for the library you are using — first, not last

GitHub and Kaggle for working examples

Your generative AI assistant of choice

Course Schedule v1.0

The schedule is tentative and may be adjusted based on class progress.

	Date	Topics
w1	09/01	Course introduction & house rules
	09/03	Group project introduction
w2	09/08	Web scraping I
	09/10	Web scraping II
w3	09/15	Lab 1: scraper build
	09/17	Mock interview 1
w4	09/22	Working with generative AI
	09/24	AI-assisted business analytics
w5	09/29	Consultation 1 – collection gate
	10/01	National Day Holiday (no class)
	10/06	
w6	10/08	Unstructured data analysis I
	10/13	Unstructured data analysis II
w7	10/15	Unstructured data analysis III
	10/20	Midterm exam review
w8	10/22	Midterm exam

A2, 11/04

A1, 09/28

A3, 12/17

	Date	Topics
w9	10/27	Lab 2: text analytics
	10/29	Git and GitHub
w10	11/03	Data visualisation & dashboards
	11/05	Consultation 2 – dataset gate
w11	11/10	Diagnostic analytics
	11/12	Causal inference I
w12	11/17	Causal inference II
	11/19	Lab 3: causal inference
w13	11/24	Prescriptive analytics I
	11/26	Prescriptive analytics II
w14	12/01	Lab 4: prescriptive analytics
	12/03	Guest speaker (tentative)
w15	12/08	Consultation 3 – presentation gate
	12/10	Final presentation I
w16	12/15	Final presentation II
	12/17	Mock interview 2

The Group Project – Preview

Full instructions on Thursday, 3 Sep. Teams are formed in that session.

Five teams of four to five, one project, running from week 2 to week 16

Five tracks, all pointed at your own market

- Track 1 — the BA labour market in China
- Track 2 — the BA labour market outside China
- Track 3 — what BA job interviews actually ask
- Track 4 — the master's programme landscape
- Track 5 — graduate admissions interviews

Three graded milestones, three in-class gates, one oral defence

The problem is deliberately under-specified. There is no answer key.

Assessment

	Component	Weight
Individual	Participation	10%
	Midterm exam	30%
Group	A1 · A2 · A3	10% · 10% · 20%
	Final presentation	20%
Total		100%

40% individual, 60% group

Your individual contribution is visible at the consultations and at the oral defence, where any member may be asked about any part of the work.

A peer-evaluation instrument will be released with the project guidelines (tentative)

Assessment – The Details

Participation 10%

- Attend and take part. Leave requests go to dchen@kean.edu with supporting documentation.
- **One point deducted per unapproved absence.** Three consecutive unapproved absences, or a missed exam, are reported to the University.

Assignments 40%

- A1 10% (28 Sep) · A2 10% (4 Nov) · A3 final report 20% (17 Dec). Late submissions lose 50%.

Midterm exam 30%

- 22 October, in class, closed-book. No make-up exam. No AI.

Final presentation 20%

- A 30-minute defence. Every member presents and answers questions on any part of the work.

AI Policy – The Rules Here

Generative AI is a required tool in this course, not a prohibited one.

1. Use it for coding, data extraction, drafting, and revision — under three conditions
 - **Disclosure** — *every deliverable carries an AI use statement: which tools, for what, and what you changed.*
 - **Verification** — *you are accountable for the accuracy of everything you submit.*
 - **Attribution** — *presenting AI-generated content as your own work violates Kean's Academic Integrity Policy.*
2. AI is not permitted in the midterm exam and in the mock interviews.
3. Detection is not the mechanism
 - *The University disabled Turnitin's AI detection in Canvas in January 2026; the tools are unreliable.*
 - *Verification here happens at the consultations and the oral defence, where you explain your own work.*

Undisclosed AI use in graded work is an academic integrity violation.

House Rules

Attendance

- Email dchen@kean.edu before class with documentation if you cannot attend.

Deadlines

- 23:59 on the stated date, submitted through Canvas. Late work loses 50%.

In class

- Laptops open in labs and consultations. Questions at any time — interrupting me is fine.

Reaching me

- Email for anything that should be on record; the class WeChat group for logistics.
- Office hours: Tue 16:00 – 17:15 | Wed 15:00 – 16:00 | Thu 14:15 – 17:00, CBPM B214.

Course materials

- Slides, notebooks, and datasets are for your own study. Do not redistribute or post them.

Before Thursday, 3 September

- 1. Read the syllabus on Canvas, end to end**

Bring any question about grading or deadlines to Thursday.

- 2. Get your environment working**

Python 3, Jupyter, VS Code, and a GitHub account.

- 3. Bring three pages you found yourself**

Two job or internship postings for a role you would want, and one master's programme page.

- 4. Come with a view on two questions**

Which of the five tracks interests you, and who you would want to work with (self vs. random grouping?).

Thursday is the project briefing and team formation. Missing it means someone else chooses for you.

Q&A

Dawei CHEN | CBPM B214 | dchen@kean.edu

Office hours: Tue 16:00 – 17:15 | Wed 15:00 – 16:00 | Thu 14:15 – 17:00

Class WeChat group: [面对面建群](#), code 0901

Next session: Thursday 3 Sep, 13:00 — group project briefing and team formation
